The Ins and Outs of It.

If you get best wear out of a coat best work must have gone into it. You can't get good bread out of poor flour.

Moral: You can't get the best out of anything unless the best is in it; and the best has to be put in before it can be taken out. Now, we have a rule to test those sarsaparillas with a big "best" on the bottle. "Tell us what's put in you and we'll decide for ourselves about the best." That's fair. But these modest sarsaparillas say: "Oh! we can't tell. It's a secret. Have faith in the label." . . . Stop! There's one exception; one sarsaparilla that has no secret to hide. It's Ayer's. If you want to know what goes into Ayer's Sarsaparilla, ask your doctor to write for the formula. Then you can satisfy yourself that you get the best of the sarsaparilla argument when you get Ayer's.

Any doubt left? Get the "Greenbook." It kills doubts but cures no doubts. Address: J. C. Ayer Co., Lowell, Mass.

THE SUN'S HEAT.

Explanation of the Process Constantly Going On.

Astronomers are now pretty generally convinced that the sun is a solid body, rendered incandescent by intense heat, and that, therefore, the rays of light are sent out from the surface of the sun, and not from the interior, as was formerly supposed.

That one of the principal elements of the sun's surface matter, or photosphere, is carbon, is a fact which is made apparent by a consideration of the following facts. The spectrum of the sun has been analyzed, and the results have clearly indicated that the matter of the solar photosphere, when the sun's light emanates, is in a gaseous state, and is, in fact, a gas.

According to this hypothesis, all the internal matter of the sun, being at a temperature of 17,000 degrees Fahrenheit, is gaseous—although highly compressed—and, being so, is comparatively dark.

But this matter, rising in convection currents to the surface, is cooled to the surface temperature, and the particles of carbon then becoming solid and highly incandescent, constitute the photosphere, or luminous shell, which surrounds the more highly heated, but darker internal matter of the sun.

THE APACHE INDIAN.

The Apache Indian procures the poison for his arrow from the rattlesnake. In August, when the rattlesnake is at its height of activity, and the Apache is at his best, the warrior places the heart or liver of a freshly killed deer within striking distance of the deadly reptile. His snake-ship prevents the presence of the curious object and sinks his fangs into it again and again.

That one of the principal elements of the sun's surface matter, or photosphere, is carbon, is a fact which is made apparent by a consideration of the following facts. The spectrum of the sun has been analyzed, and the results have clearly indicated that the matter of the solar photosphere, when the sun's light emanates, is in a gaseous state, and is, in fact, a gas.

According to this hypothesis, all the internal matter of the sun, being at a temperature of 17,000 degrees Fahrenheit, is gaseous—although highly compressed—and, being so, is comparatively dark.

But this matter, rising in convection currents to the surface, is cooled to the surface temperature, and the particles of carbon then becoming solid and highly incandescent, constitute the photosphere, or luminous shell, which surrounds the more highly heated, but darker internal matter of the sun.

According to this hypothesis, all the internal matter of the sun, being at a temperature of 17,000 degrees Fahrenheit, is gaseous—although highly compressed—and, being so, is comparatively dark.

But this matter, rising in convection currents to the surface, is cooled to the surface temperature, and the particles of carbon then becoming solid and highly incandescent, constitute the photosphere, or luminous shell, which surrounds the more highly heated, but darker internal matter of the sun.

UP GOES THE . . . COST OF LIVING.

Shoppers and Buyers at Retail Must Expect to Pay Higher Prices for Almost Every Article of Daily Consumption.

Washington, July 28.—In the domain of the House and Home the duties of the new Tariff bill will begin with kindling wood and end with the shingles on the roof. The duty on kindling wood has been placed at three-tenths of a cent on bundles of the size of one-fourth of a cubic foot, and it increases three-tenths of a cent for each additional quarter of a cubic foot.

The coal which is to be used will have a duty of 67 cents a ton. Under the Wilson law it is 40 cents a ton. The passage of this bill adds an additional duty. The rate on tin plates has been increased from 1.5 to 1.6 cent per pound to the manufacturer. The duty on cheap brown or yellow earthenware has been increased from 20 to 25 per cent.

China ware has an increased duty of 25 per cent, being raised from 35 to 60 per cent. Besides, two new classifications have been placed on the dutiable list. On pressed glass the duty has been increased from 40 per cent. under the Wilson law to 60 per cent. On cut glass the increase has been 15 per cent, from 35 to 50 per cent. Decanters, etc., have an increased duty of from 40 to 60 per cent.

More duty on all furniture. The duty on all furniture has been raised from 22 per cent. to 35. Marble mantels have an additional duty of fifteen cents, the duty being raised from 50 to 65 cents per cubic foot. Ten per cent. additional has been laid on carved and turned table covers made of cotton chenille, and the same additional rate is laid on curtains made of other materials. Table damask has an added duty of five per cent, being raised from 35 to 40 per cent, and pillow shams and other bed coverings are specially provided for. Blankets are divided into a number of dutiable classes, and the rate has been increased from 29 per cent. under the Wilson law to an average between 75 and 80 per cent.

Woolen underwear does not escape. On cotton cloth, one of the most widely used articles in woman's realm, the new tariff bill has been most carefully drawn. On a large proportion of the various grades of cotton goods, the rate under the Wilson law, but few changes have been made in rates, but many changes have been made in classification, and these make the actual differences very wide. As many as twenty-seven new classes have been added to this division of the cotton schedule.

All cotton plushes, velvets, velveteens, etc., will now cost the woman 34 per cent. more than under the Wilson law. The rate has been raised from 40 per cent. to 74.67 per cent. The classifications have not been changed, but the duties have been increased in each case. All woolen plushes have been increased from 40 per cent. to rates that run from 88 to 147 per cent. Silk plushes, velvets and all chenilles fare equally as badly. Every classification of rates has been increased. The increases range from 15 to 30 per cent. So the shopper can prepare to take that much more money with her when she starts out to procure her winter outfit.

THE GREAT SPORT AWAITING THE HUNTER WHO INVADERS CENTRAL AFRICA.

There is a great sport awaiting the willow hunter who press across the dry deserts of the North Kalahari, to the Boteti or Lake River, as it is usually called. This is where the pelicans, flamingoes, ibises, storks, cranes, herons, fishing eagles, jacanas, coots, rails and other aquatic birds unknown to most sportsmen rub bills with ducks, geese, plovers and teal in countless flocks, of every bird showing the like of which can scarcely be found elsewhere.

The water fowl of South Central Africa, when the Boteti overflows during the dry season, as it does every year from April to August, gather in the great marshes. There are also side shots to be taken daily with rifles at grasses, wild boar, gazelle, springbok, and other desert and woods creatures. The camp is made in an open grove of camelthorn and mopane trees on a piece of rising ground. Nearly by a big lagoon, and at daybreak wild geese tell the hunters to get up, which the hunters do, with loaded guns. A little sneak, which need not be too carefully made, brings the hunters to the lagoon and goes off, dropping to the ground before the sun rises.

Rare live—a kind of water birch—may be seen occasionally on still hunting expeditions. Near lagoons Egyptian geese, black and white spur-winged geese, knob-billed geese, yellow-billed geese, red-billed teal, capybaras, wild turkeys, ducks, dark brown African scorpions, avocets and other water birds are seen. A shot puts them to flight, and for hours one may shoot them as they come and go in screaming flocks, as one may travel from lagoon to lagoon and shoot with no interval of shooting for days. It is all warm weather shooting, with no cold rains to chill one.

There is a class of people who are injured by the use of coffee. Recently there has been placed in all the grocery stores a new preparation called GRAIN-O, made of pure grains, that takes the place of coffee. The most delicate stomach receives it without distress, and but few can tell it from coffee. It does not cost over 1¢ as much. Children may drink it with great benefit. 15 cts. and 25 cts. per package. Try it. Ask for GRAIN-O.

In alluding to the fact that Kansas City's population has increased 12,000 in one year, the Star asks: "Who did it?" A possible explanation is found in the remark of a Republican statesman who tried to account for the Democratic tide which followed the enactment of McKinley's law of 1890. "The women did it," he said.—Galveston News.

Shake Into Your Shoes Allen's Foot-Ease, a powder for the feet. It cures painful, swollen, smarting feet and instantly relieves the stinging of corns and bunions. It's the greatest comfort discovery of the age. Allen's Foot-Ease makes light-fitting or new shoes feel easy. It is a certain cure for sweating, callous and hot, tired, aching feet. Try it to-day. Sold by all druggists and shoe stores. By mail for 25 cents in stamps. Trial package FREE. Address, Allen S. Olmsted, Le Roy, N. Y.

A conference of men and women interested in the great social, hygienic and philanthropic questions pertaining to the welfare of human society will be held at Battle Creek, Mich., October 12-17, 1897. Papers and addresses will be given by the most prominent men and women of the world. It is hoped that this discussion may lead to some practical methods of reforming certain of our vices and sins.

Did You Ever Try Electric Bites as a remedy for your rheumatism and get relief? This medicine has been found to be particularly adapted to the relief and cure of all kinds of rheumatism, neuralgia, sciatica, etc., and is a most valuable remedy for all who suffer from these troubles. It is sold by G. R. Baker and Sons Drug Store.

Mr. Cecil Rhodes has bought Sauerdams near Bulawayo, South Africa. It consists of ten farms, which he intends to cultivate. He will build the largest dam in South Africa.

The Best Salve in the world for Cuts, Bruises, Burns, Scalds, Rashes, Fomies, Sores, and all Skin Eruptions, and for all kinds of itching and burning. It is guaranteed to give satisfaction or money refunded. Price 25 cents per box. For sale by Geo. R. Baker & Son's.

ROYAL BAKING POWDER. Absolutely Pure. It makes the best of all flours. It is the standard of excellence for all baking purposes.

Riding on the Platform. A man went into a Pennsylvania Railroad recently with a suit against a railroad company for putting him off a train. He claimed that he took a seat upon the platform because he had only a short distance to go and it was not worth his while to ride inside. The conductor told him it was against the rules to ride outside upon a platform and he must either ride inside or be put off. He refused and was ejected from the train. Then he brought suit. The company contended it was his duty to prevent accidents and it was therefore his duty to forbid passengers from riding on the platform. The Court held the rule to be a reasonable one and sustained the company.

It Was Evident. "She says it's her first summer at the seashore." "It was unnecessary for her to mention the fact. All of the rest of the girls knew it." "Well, I should think so. Why, she actually wore her bathing suit into the water?"

Indigestion is often taken for consumption. The word consumption means wasting away, and dyspepsia often wastes away as badly as consumption. The reason people waste away is because either they don't get enough to eat, or they don't digest what they do eat. If the latter is your trouble, take Shaker Digestive Cordial. This will help you to digest your food and stop your loss of flesh.

Shaker Digestive Cordial is made from herbs, berries and the juice of fruit, by the well-known Shakers at Mount Lebanon. It possesses great tonic and digestive powers. Shaker Digestive Cordial has cured many supposed consumptives (who were really dyspeptics), by simply helping their stomachs to digest their food, thus giving them nourishment and new strength. Sold by druggists. Trial bottles 10 cents.

Freddie's Query. Freddie—It's always in damp places where mushrooms grow and it's papa? Papa—Yes, my boy. Freddie—Is that the reason they look like umbrellas, papa?

An Opportunity You Now Have of testing the curative effects of Ely's Cream Balm, the most positive Cure for Catarrh known. Ask your druggist for a 10 cent trial size or send 10 cents, we will mail it. Full size 50 cents. ELLY BROS., 56 Warren St., N. Y. City. My son was afflicted with catarrh. I induced him to try Ely's Cream Balm and the disagreeable catarrhal smell all left him. He appears as well as any one. —J. G. Olmstead, Arrol, Ill.

Impossible. "She here, that horse you sold me runs away, kicks, bites, strikes and tries to tear down the stable at night. You told me that if I got him out I would not part with him for \$1,000." "Well, you won't."

Maine's Oldest House. The oldest house in Maine is said to be the one at Saco, near the mouth of the Saco River, which is said to be 150 years old.

Castoria. For Infants and Children. It is a most valuable remedy for all who suffer from these troubles. It is sold by G. R. Baker and Sons Drug Store.

Table with 4 columns: Central Time, P.M., A.M., and P.M. Rows include Cleveland, Columbus, Cincinnati, etc.

Table with 4 columns: Central Time, P.M., A.M., and P.M. Rows include Cincinnati, Columbus, Cleveland, etc.

Summer is rapidly passing. It is not our custom to carry goods over. Prefer to give you irresistible bargains that will surely sell the goods.

Every thing will go during the next 30 days regardless of cost to make room for our early fall arrivals. Men's, Boys' and Children's Suits and Single Garments—all are being offered for about the cost of making. Don't miss this opportunity to obtain goods at such low figures that no other store can or will attempt to duplicate.

Mott's Nerve Pills. The great remedy for nervous prostration, loss of vitality, and all nervous diseases of the generative organs of either sex, such as Nervous Prostration, Falling of the Testes, Impotency, Nightly Emissions, Youthful Errors, Mental Worry, excessive use of Tobacco or Opium, which lead to Consumption and Insanity. \$1.00 per box by mail, 6 boxes for \$5.00.

THE INFLUENCE of the Mother shapes the course of unborn generations—goes sounding through all the ages and enters the confines of Eternity. With what care, therefore, should the Expectant Mother be guarded; and how great the effort be to ward off danger and make her life joyous and happy. MOTHER'S FRIEND always all Nervousness, re-lieves the Headache, Cramps, and Nausea, and so fully prepares the system that Childbirth is made easy and the time of recovery shortened—many say "stronger after than before confinement." It insures safety to life of both mother and child. All who have used "Mother's Friend" say they will never be without it again. No other remedy cures confinement of the pain.

HOW MANY VOTES will the successful candidate for Governor of Ohio receive on election day, November 2d, 1897? We will give \$5,000 in Prizes to the users of our popular brands—Jersey and O.R. Brands of Standard and High Grade ROASTED COFFEE.

It will go... Right to the spot. Ayer's Hair Vigor will go right to that bald spot and begin to bring the hair back. It Makes Hair Grow.

YOUNG AMERICA CLOTHING HOUSE. I. & D. ROSENTHALL, Proprietors. Opera House Block, Corner Main and Vine Streets, Mt. Vernon, O.
